STARPROJECT 2
MISSIVE 02

Songlines

In an Australian Aboriginal context, Songlines can be described as short, sung verses that correspond to features in a landscape, such as mountains, springs, and outcrops, visited in a fixed order along a path. They can tell "the law for caring for each other and Country."

Department of Ancestral Algorithms

CUT ALONG DOTTED LINE

Punched Cards

Modern computing begins with the story of punched cards. They brought us to the moon, and they figured largely in the Analytical Engine design. Offering an early analog to digital bits, they encoded informative operations for the first general purpose calculation machines.

Department of Digital Deja Vu

DIAGRAMMING THOUGHTS:
1. select a notepad (analog or digital) just for this
2. everyday you must draw a diagram that reflects the day before
3. you can include words, images and links
4. at the end of each cycle, you must combine the daily diagrams into one, all-encompassing diagram (which can be achieved through multiple ways, for example by creating connecting points, or by further abstracting and using the daily diagrams as sources to be simplified in a single weekly/monthly/yearly diagram)

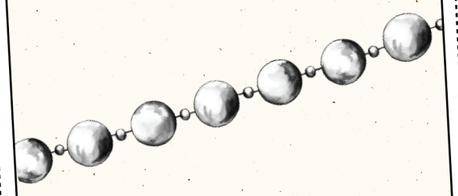
Soundbyte Necklace

Department of Attire Arts



[1]Wear Soundbyte Necklace to a place you wish to remember. [2]Each of the seven beads contains a tiny microphone and seven seconds of storage. [3]When you encounter a byte you want to collect, tap twice on a bead. [4]After filling all seven beads, Sound Byte will glow. [5]Double tap on the Play Bead to share sound sequence with a friend.
